Two Sections—Section 2

Electrical Engineering

December
1938

Annual REFERENCE INDEX 1938

Part 1—ELECTRICAL ENGINEERING

Part 2—AIEE TRANSACTIONS

See next page for details

Published by the American
Institute of Electrical Engineers
33 West 39th Street, New York, N. Y.

Graduates in Industry, Training Engineering. Morrow 441–4
Graphical Field-Plotting Methods in Engineering. (Filler) 448
Graphical Representation of the a-Operator. (Letter) Fishman 318
Graphical Solution of Impedances in Parallel. (Letter) Clarke 41–2
Graphics in the Solution of Complex Quantities. Goodale 453–4
Guides for Electrical Transmission, Wave. Southworth 91–5

H

Harmonics for Fractional Slot Windings, Amplitudes of Magnetomotive-Force. (Filler) 488
Harrison Emphasizes the Institute's Fundamental Responsibilities, President .. 279–80
Heat Transfer From Range Units, Influence of Utensils on. Short 449–52
High-Voltage Dielectrics, Chemistry and. Clark 489–92
High-Voltage Gaseous and Fluorescent Tubes for Advertising and Architectural Lighting. McDermott 286–90
(History) Our Scientific Era—The Historical Point of View. Still 384–6

I

(Illumination) Low-Voltage Fluorescent Lamps. Inman, Thayer 245–8
Impedance Notation, Symmetrical-Component. (Letter) Kimbark 431
Impedances in Parallel, Graphical Solution of. (Letter) Clarke 41–2
Importance of Research and Development in Maintaining Technical Progress, The. Smith 484–8
Induction Machine, An Analysis of the. (Filler) 417
(Industrial) New 98-Inch Continuous-Strip Steel Mill Opened at Cleveland. (Filler) 154
(Industrial) Recent Trends in Electronic Technology. Fink 100–07
(Industrial) Trends in Steel-Mill Electrification. Umansky 96–9
Industry, The Young Engineer's First Years in. Eidmann 206–8
Industry, Training Engineering Graduates in. Morrow 441–4
Influence of Utensils on Heat Transfer From Range Units. Short 449–52
Institute's Fundamental Responsibilities, President Harrison Emphasizes the ... 279–80
Insulation, Fibrous Glass for Electrical. Ferris, Moses 480–3
Interconnected Electric Power Systems. Sporn 16–25

J

Journals for Electrical Engineers. Dalziel. 110–13
Letters 359, 392

K

("Kelvin," Cable Ship) Protection of Submarine Cables by Placement "Underground" 204–5

L

Labor Policy and Employment. Wolman. 413–17
Lamme Medalist, Robert E. Doherty—1937. Stevenson 420–3
Lamps, Low-Voltage Fluorescent. Inman, Thayer 245–8
Law, Engineering and the. Appleton 477–9
Legislators Cool, New Equipment to Keep. (Filler) 344
Letters to the Editor
AIEE Publications. Dickinson 318
Ambient Temperatures for Overloading Transformers. Woodrow 392
Cable and Damper Vibration Studies. Pipes 318
Preiswerk 229
Capacitor Motors With Deep-Slot Rotors. Puchstein, Lloyd 42–3
Chance and Choice in Engineering. Scott 318
Critical Conditions in Ferroresonance. Dwight 466
Dielectric Circuit, The. Ewing 182
D-C Transformers and Transmission. Laub 467
Electron Theory. Milmow 230
Engineers and Social Problems. Jansky. 431
Graphical Representation of the a-Operator. Fishman 318
Graphical Solution of Impedances in Parallel. Clarke 41–2
Graphical Solution of Multiple Resistance and Reactance. Goodale 82–3
Interest in Section Meetings. Seeley ... 82
Journals for Electrical Engineers
Hoadley 360
Roehmann 392
Magnetic Force of a Solenoid. Fleischmann 268
Pareto—Engineer, Economist, Sociologist. Sweet 183
Preparation of Manuscripts
Douglas 359
Holslag 230
Ketcham 359
Malti 358
Registration of Engineers
Conlon 137
Goodspeed 182
Leavitt 42
Legare 183
Lumley 230
Review of Radio Interference Investigation, A. Kalb 137
Role of the Engineering Library, The. Naeter 392
Sharp Cutoff in Vacuum Tubes With Application to the Slide-Back Voltmeter. Fett 432
Some Electronic Switching Circuits. Brown, Ryburn 360
Shumard 467
Symmetrical-Component Impedance Notation. Kimbark 431
Tensor Analysis. Slepian 83
Tensor Analysis in Electrical Engineering. Ingram 41
Tensors—in Words of One Syllable. Blade 466
Wave Shape of Magnetizing Currents. Clarke 268
What Is Tensor Analysis?
Hoffmann 137
Rose 560
Library, The Role of the Engineering. Craver 291–4
Letter 392
Lighting, High-Voltage Gaseous and Fluorescent Tubes for Advertising and Architectural. McDermott 286–90
Lightning to the Empire State Building. McEachron ..... 493–505 and 507
Locomotives, Electric. (Filler) 294
Low-Voltage Fluorescent Lamps. Inman, Thayer 245–8

M

Machine, An Analysis of the Induction. (Filler) 417
Magnetic Force of a Solenoid. (Letter) Fleischmann 268
Magnetizing Currents, Wave Shape of. (Letter) Clarke 268
Magnetomotive-Force Harmonics for Fractional Slot Windings, Amplitudes of. (Filler) 488
Manuscripts, Preparation of. (Letters)
Douglas 359
Holslag 230
Ketcham 359
Malti 358
(Mathematics) Graphics in the Solution of Complex Quantities. Goodale 453–4
Mathematics in Engineering, Usefulness of. (Letters)
Douglas 359
Ketcham 359
Malti 358
(Mathematics) Tensors—in "Words of One Syllable." Skilling 378–82
Letter 466
(Mathematics) What Is Tensor Analysis? Hoffmann
Part I 3–8
Part II 61–6
Part III 108–09
Letters 137, 360
Medalist, Robert E. Doherty—1937 Lamme. Stevenson 420–3
Medicine, Electricity in. Williams 237–44
Message From the President, A. Parker .. 331
Miscellaneous Short Items
Absolute Power Factor of Air Capacitors. 452
Amplitudes of Magnetomotive-Force Harmonics for Fractional Slot Windings 488
Analysis of the Induction Machine, An .. 417
Basic Equations for Electric and Sound Radiation 507
Boulder Power for Nevada 95
Culture in This Age of Science 9
Education and Business Leadership 77
Electric Locomotives—1888 and 1938 ... 294
Electrification of French Railways 167
Engineer of the Future, The 280
Graphical Field-Plotting Methods in Engineering 448
New Equipment to Keep Legislators Cool. 344
New 98-Inch Continuous-Strip Steel Mill Opened at Cleveland 154
New Swiss Lake, A 175
Noise Specifications for Power Transformers 382–3
Reactance of Square Tubular Bus Bars .. 488
Selection and Design of the Electrification of the San Francisco-Oakland Bay-Bridge Railway 488
Stability Characteristics of Turbine Generators 459
Symbolic Analysis of Switching Circuits. 459
Transmission Theory of Spherical Waves. 383
Voltage Distribution in the Welding Arc. 285
Motors With Deep-Slot Rotors, Capacitor. (Letter) Puchstein, Lloyd 42–3

N

Natural, Radioactivity, Artificial and. Darrow 193–203
Nevada, Boulder Power for. (Filler) 95
New Equipment to Keep Legislators Cool. (Filler) 344
New 98-Inch Continuous-Strip Steel Mill Opened at Cleveland. (Filler) 154
Noise Specifications for Power Transformers. (Filler) 382–3

O

Operator, Graphical Representation of the a-. (Letter) Fishman 318
Opportunity for the Young Engineer, Today's. Harrison 256–8
Orientation, Engineering. Parker 369–71
Our Scientific Era—The Historical Point of View. Still 384–6

P

Paradox of Social Progress, The. Doherty 444–8
Pareto—Engineer, Economist, Sociologist. (Letter) Sweet 183
Pennsylvania Railroad's Electrified System, Extension of The. Griffith 10–15
Politics, and Government, Some Observations on Economics. Mooney 164–7
Power Factor of Air Capacitors, Absolute. (Filler) 452
Power Systems, Interconnected Electric. Sporn 16–25
Precipitation, Electrical. Schmidt, Anderson 332–8
Preparation of Manuscripts. (Letters)
Douglas 359
Holslag 230
Ketcham 359
Malti 358
President, A Message From the. Parker ... 331
Progress in Weather Forecasting. Gregg ... 405–12
Progress, The Importance of Research and Development in Maintaining Technical. Smith 484–8
Progress, The Paradox of Social. Doherty. 444–8
Protection of Submarine Cables by Placement "Underground" 204–5
(Protective Devices) European Switchgear Developments. Prince 155–63
Publications, AIEE. (Letter) Dickinson .. 318

Q

Quantities, Graphics in the Solution of Complex. Goodale 453–4

R

Radiation, Basic Equations for Electric and Sound. (Filler) 507
Radiation, Sterilization by Ultraviolet. Hibben, Blackburn 455–9
Radio Interference Investigation, A Review of. (Letter) Kalb 137
Radioactivity, Artificial and Natural. Darrow 193–203
Railroad's Electrified System, Extension of The Pennsylvania. Griffith 10–15
Railway, Electrification of the Bay-Bridge. Lebenbaum 372–7, 383
Railways, Electrification of French. (Filler) 167
Range Units, Influence of Utensils on Heat Transfer From. Short 449–52
Reactance, Graphical Solution of Multiple Resistance and. (Letter) Goodale 82–3
Reactance of Square Tubular Bus Bars. (Filler) 488
Recent Trends in Electronic Technology. Pink 100–07
Registration of Engineers. (Letters)
Conlon 137
Goodspeed 183
Leavitt 42
Legare 183
Lumley 230
Research and Development in Maintaining Technical Progress, The Importance of. Smith 484–8
(Research) Radioactivity, Artificial and Natural. Darrow 193–203
(Research) Sterilization by Ultraviolet Radiation. Hibben, Blackburn 455–9
Resistance and Reactance, Graphical Solution of Multiple. (Letter) Goodale 82–3
Responsibilities, President Harrison Emphasizes the Institute's Fundamental 279
Review of Radio Interference Investigation, A. (Letter) Kalb 137
Role of the Engineering Library, The. Craver 291–4
Letter 392
Rural Electrification in England 345–8

S

(San Francisco) Electrification of the Bay-Bridge Railway. Lebenbaum 372–7, 383
San Francisco-Oakland Bay-Bridge Railway, Selection and Design of the Electrification of the. (Filler) 488
Science and the Future of Aviation. Sikorsky 149–53
Scientific Era—The Historical Point of View, Our. Still 384–6
Selection and Design of the Electrification of the San Francisco-Oakland Bay-Bridge Railway. (Filler) 488
Shape of Magnetizing Currents, Wave. (Letter) Clarke 268
Sharp Cutoff in Vacuum Tubes With Applications to the Slide-Back Voltmeter. (Letter) Fett 432
Sheath Corrosion, Determination of the Cause of. Radley 168–71
Social Progress, The Paradox of. Doherty. 444–8
Sociologist, Pareto—Engineer, Economist. (Letter) Sweet 183
Solenoid, Magnetic Force of a. (Letter) Fleischmann 268
Solution of Complex Quantities, Graphics in the. Goodale 453–4
Some Electronic Switching Circuits Shumard 209–20
Letters 360, 467
Some Fundamentals in Standardization. Jewett 57–60
Some Observations on Economics, Politics, and Government. Mooney 164–7
Sound Radiation, Basic Equations for Electric and. (Filler) 507
Spherical Waves, Transmission Theory of. (Filler) 383
Stability Characteristics of Turbine Generators. (Filler) 459
Standardization, Some Fundamentals in. Jewett 57–60
Status of the Engineer, The Economic. Sorensen 281–5
Steel-Mill Electrification, Trends in. Umansky 96–9
Steel Mill Opened at Cleveland, New 98-Inch Continuous-Strip. (Filler) 154
Sterilization by Ultraviolet Radiation. Hibben, Blackburn 455–9
Stray-Current Electrolysis—Some Fundamentals. Longfield 67–77
Submarine Cables by Placement "Underground," Protection of 204–5
Swiss Lake, A New. (Filler) 175
Switchgear Developments, European. Prince 155–63
Switching Circuits, Some Electronic. Shumard 209–20
Letters 360, 467
Switching Circuits, Symbolic Analysis of. (Filler) 459
Symmetrical-Component Impedance Notation. (Letter) Kimbark 431
System, Extension of The Pennsylvania Railroad's Electrified. Griffith 10–15
Systems, Interconnected Electric Power. Sporn 16–25

T

Technical Progress, The Importance of Research and Development in Maintaining. Smith 484–8
Technological Development in Relation to Economics. Moulton 51–6
Telephone Lines, Transcontinental. Pilliod ..... 418–19 and 423
Television Transmission by Coaxial Cable. Strieby 249–56
Temperatures for Overloading Transformers, Ambient. (Letter) Woodrow 392
Tensor Analysis. (Letter) Slepian 83
Tensor Analysis in Electrical Engineering. (Letter) Ingram 41
Tensor Analysis, What Is. Hoffmann.
Part I 3–8
Part II 61–6
Part III 108–9
Letters 137, 360
Tensors—in "Words of One Syllable." Skilling 378–82
Letter 466
Theory, Electron. Kloeffler 26–32
Letter 230
Theory of Spherical Waves, Transmission. (Filler) 383
Today's Opportunity for the Young Engineer. Harrison 256–8
Training Engineering Graduates in Industry. Morrow 441–4
Transcontinental Telephone Lines. Pilliod ..... 418–19 and 423
Transformers, Ambient Temperatures for Overloading. (Letter) Woodrow 392
Transformers and Transmission, D-C. (Letter) Laub 467
Transformers, Noise Specifications for Power. (Filler) 382–3
Transmission by Coaxial Cable, Television. Strieby 249–56
(Transmission) Interconnected Electric Power Systems. Sporn 16–25
Transmission Theory of Spherical Waves. (Filler) 383
Transmission, Wave Guides for Electrical. Southworth 91–5
(Transportation) Extension of The Pennsylvania Railroad's Electrified System. Griffith 10–15
Trends in Economic Thought, The Engineer and. Jewett 339–44
Letter 431
Trends in Steel-Mill Electrification. Umansky 96–9
Tubes for Advertising and Architectural Lighting, High-Voltage Gaseous and Fluorescent. McDermott 286–90
Tubes With Applications to the Slide-Back Voltmeter, Sharp Cutoff in Vacuum. (Letter) Fett 432
Turbine Generators, Stability Characteristics of. (Filler) 459

U

Ultraviolet Radiation, Sterilization by. Hibben, Blackburn 455–9
Usefulness of Mathematics in Engineering. (Letters)
Douglas 359
Ketcham 359
Malti 358
Utensils on Heat Transfer From Range Units, Influence of. Short 449–52

V

Vacuum Tubes With Applications to the Slide-Back Voltmeter, Sharp Cutoff in. (Letter) Fett 432
Value of the AIEE to Electrical Engineers. Parker 506–7
Vibration Studies, Cable and Damper. (Letters)
Pipes 318
Preiswerk 229
Voltage Distribution in the Welding Arc. (Filler) 285
Voltmeter, Sharp Cutoff in Vacuum Tubes With Applications to the Slide-Back. (Letter) Fett 432

W

Wave Guides for Electrical Transmission. Southworth 91–5
Wave Shape of Magnetizing Currents. (Letter) Clarke 268
Weather Forecasting, Progress in. Gregg. 405–12
Welding Arc, Voltage Distribution in the. (Filler) 285
What Is Tensor Analysis? Hoffmann.
Part I 3–8
Part II 61–6
Part III 108–9
Letters 137, 360
Windings, Amplitudes of Magnetomotive-Force Harmonics for Fractional Slot. (Filler) 488

Y

Young Engineer's First Years in Industry, The. Eidmann 206–8

Best Attended Since 1931..... 114
Moulton to Address Convention General Session..... *36
Officers to Be Nominated..... 38
Report Planned for March Issue..... 78
Reports of Sessions and Activities..... 116
Reports of 13 Committee Meetings..... 132
Student Counselors Hold Annual Luncheon Meeting..... 129
Winter Convention 1939
Portions of Downtown Brooklyn and New York (Photo)..... 509
Preliminary Plans For Cell Excellent Program. 508
Radio City Music Hall (Photo)..... 512
Symposium on Apparatus Rating Proposed. 425
Member-for-Life List, Additions to..... 297
Members Planning Trips Abroad, To Institute. 179
Membership Letters
Anderson..... 79
Bankus..... 299
Cooper..... 355
Cora..... 118
Doolittle..... 268
Gunther..... 225
Kositsky..... 352
Love..... 181
McCormack..... 37
National Committee..... 513
Webb..... 427
Membership; Transfer sand Elections. 48, 86, 143, 189, 234, 275, 326, 364, 395, 437, 473, 524
Metcalfe, G. R., Former AIEE Editor, Dead. 131

N

Norris, F. A., Appointed Business Manager.. *38

O

Officers (AIEE) to Be Nominated Soon..... 38
Officers and Committees (1938–39)
Branches..... 400
District..... 399
National..... 397
Sections..... 401
Officers Elected at AIEE 1938 Summer Convention, New..... 303
(Officers) Nominating Committee Announces Candidates..... 131
(Officers) Nomination of AIEE Officers for 1939 Election; Members' Suggestions Invited Until December 15..... 462

P

Paper, District 6 Award for Branch..... 35
Paper, District 7 Award for Branch..... 512
Prize Awards Announced by District 8, Additional..... 390
Prize Awards Announced for 1937 Papers, AIEE National..... 262
Prize Awards for Papers, Five Districts Announce..... 316
Prizes for Papers, AIEE National and District. 511
Prizes for Papers Partially Restored, Cash... 37
Prizes, New York Power Group Awards Paper..... 226

R

Report of the Board of Directors..... 305
Requirements for Fellow Grade Now in Effect, New..... 358
Research Projects, Institute Funds for..... 390

S

SECTION ACTIVITIES

Additions to Annual Report..... 316
Annual Report for 1937–38..... 263
Atlanta Becomes Georgia Section..... 179
Cincinnati Organizes Study Group..... 39
Detroit-Ann Arbor Section Becomes Michigan Section..... 357
Georgia Section, Atlanta Becomes..... 179
Meetings, Interest in. (Letter) Seeley.... 80
Muscle Shoals, AIEE Section Organized at. 177
New Orleans Inspects Sulphur Plant. (Photo)..... 180
New York Group Inspects The "Lord Kelvin"..... 226
New York Power Group Awards Paper Prizes..... 226
New York Visits Pittsfield, Mass. (Photo). 259
"Self-Analysis," Institute's Major Objectives Reaffirmed in..... 134
Slichter Visiting South America, Treasurer. 461

STANDARDS

Automatic Stations..... 182
Bushings, Standardization of..... 182
Oil Circuit Breakers..... 182
Rating and Recommendations on Operation. 182
Relays..... 182
Standards, Transformer Subcommittee Discusses..... 304

STUDENT BRANCH ACTIVITIES

Additions to Annual Report..... 316
Annual Report for 1937–38..... 263
Case School of Applied Science, Student Group at. (Photo)..... 81
Conference Held at Virginia Military Institute..... 227
Conference Held by North Central District. 261
Convention to Be Held at Lenox, Mass.... 176
Counselors Hold Annual Luncheon Meeting. 129
New York City District Holds Convention. 316
Promotional Blotter Distributed by AIEE Branch..... 463
South West District to Meet, Student Branches of..... 179
South West Student Conference at Kansas State..... 304
Student Convention Held at Lenox..... 298

T

TRANSACTIONS Supplement for 1938 to Be Issued..... 429
To Be Issued in December..... 463
Telemetering Now Being Revised, Report on. 178
Testing and Application of Lightning Arresters..... 226

V

Vinal, G. W., Awarded Planté Medal..... 350

Y

Year Book Is Now Available, 1938, AIEE... 225

Part 2—TRANSACTIONS

(See page 2 for explanation)

Technical-Subject Index

Absolute Power Factor of Air Capacitors, Kouwenhoven, Lotz 766–72
Disc. and closure 772
Accounting, A System of Electric Remote-Control. Woodruff 78–87
Disc. and closure 357
Air Capacitors, Absolute Power Factor of. Kouwenhoven, Lotz 766–72
Disc. and closure 772
Aircraft, Present-Day and Probable Future Electrical Applications in. Boughton. (Aug. 1937, p. 959–63) 169
Disc. and closure 169
Alternator Short-Circuit Currents Under Unsymmetrical Terminal Conditions. Miller, Weil. (Oct. 1937, p. 1268–76) 401
Disc. 401
Amplifier for Measurement Purposes, A Stabilized. Thompson 379–83
Disc. and closure 383
Amplitudes of Magnetomotive Force Harmonics for Fractional Slot Windings—I. Calvert 777–84
Disc. and closure 784
An Analysis of the Induction Machine. Stanley 751–5
Disc. and closure 756
Analysis and Design of Harmonic Generators. Terman 640–5
Analysis of Series Capacitor Application Problems. Butler, Concordia. (Aug. 1937, p. 975–88) 110–11
Disc. and closure 110–11
Analysis of the Induction Machine, An. Stanley 751–5
Disc. and closure 756
Analyzer, A New A-C Network. Kuehni, Lorraine 67–73
Disc. and closure 418
Apparatus, Radio Influence Characteristics of Electrical. Bellaschi, Aggers 626–33
Disc. 633
Application and Performance of Carrier-Current Relaying, The. Sporn, Muller. 118–24
Disc. and closure 281
Application of Capacitors for Power-Factor Correction in Industrial Plants, The. von Sothen 505–09
Application of Large Phase-Shifting Transformer on an Interconnected System Loop. Lyman, North 579–87
Disc. and closure 587
Application of Modern Electric Vehicles to Urban Transportation. Davis 57–60
Application Problems, Analysis of Series Capacitor. Butler, Concordia. (Aug. 1937, p. 975–88) 110–11
Disc. and closure 110–11
Application, Recovery-Voltage Characteristics of Typical Transmission Systems and Relation to Protector-Tube. Evans, Monteith 432–40
Disc. and closure 440
Application, Some Engineering Features of Petersen Coils and Their. Hunter. 11–18
Disc. and closure 289
Application, System Analysis for Petersen-Coil. Champe, Von Voigtlander 663–72
Disc. and closure 672
Applications in Aircraft, Present-Day and Probable Future Electrical. Boughton. (Aug. 1937, p. 959–63) 169
Disc. and closure 169
Applications, Some Schemes of Current-Limiting-Reactor. Kierstead 272–8
Disc. and closure 278
Arc-Length Monitor, An Electronic. Richter 115–17
Disc. and closure 226
Arc-Welding Generators in Terms of Welding Performance, Interpretation of Oscillograms of. Hansen 177–82
Disc. and closure 182
Arrester, Characteristics of the New Station-Type Autovalve Lightning. Roman. (July 1937, p. 819–22) 286
Disc. and closure 286
Arrester Performance Data, Line-Type Lightning. Committee Report 661–2
Arresters—II, Discharge Currents in Distribution. McEachron, McMorris 307–12
Disc. and closure 312
(Automatic Stations) A Self-Checking System of Supervisory Control. Reagan. 600–05
Disc 605
Autovalve Lightning Arrester, Characteristics of the New Station-Type. Roman. (July 1937, p. 819–22)
Disc. and closure 286

B

Bars, Reactance of Square Tubular Bus. Dwight, Wang 762–5
Disc. and closure 765
Basic Equations for Electric and Sound Radiations. Hazeltine 774–6
(Basic Sciences) A Static Constant-Current Circuit. Summers 636–9
(Basic Sciences) A Symbolic Analysis of Relay and Switching Circuits. Shannon. 713–23
(Basic Sciences) Basic Equations for Electric and Sound Radiations. Hazeltine. 774–6
(Basic Sciences) Graphical Field-Plotting Methods in Engineering. Poritsky 727–32
(Basic Sciences) Transmission Theory of Spherical Waves. Schelkunoff 744–50
Breaker, Design and Test of High-Speed High-Interrupting-Capacity Railway Circuit. Skeats 359–63
Disc. and closure 363
Breaker of High Interrupting Capacity, Enclosed Low-Voltage "De-ion" Air Circuit. Sandin 657–61
Breaker, Tests on and Performance of a High-Speed Multibreak 138-Kv Oil Circuit. Sporn, St. Clair 696–703
Disc. and closure 703
Breakers, A New Multibreak Interrupter for Fast-Clearing Oil Circuit. Spurck, Strang 705–10
Disc. and closure 710
Breakers for A-C Feeder, Motor Starting, and Station Auxiliary Service, "De-ion" Air Circuit. Dickinson 649–53
Disc. and closure 653
Bridge Railway, Selection and Design of the Electrification of the San Francisco-Oakland Bay. Monroe 791–6
Disc 796
Brushes for Steel-Mill Equipment, Carbon. Kalb. (Sept. 1937, p. 1165–8)
Disc. and closure 114
Bus Bars, Reactance of Square Tubular. Dwight, Wang 762–5
Disc. and closure 765
Bushings and Transformer Insulation by the Power-Factor Method, Field Testing of. Gross 589–96
Disc. and closure 596
Busses, Operating Experiences With Gas-Electric-Drive Motor. Stier 318–23

C

Cable Carrier System, Crystal Channel Filters for the. Lane 245–9
Disc. and closure 259
Cable Carrier-Telephone System, Crosstalk and Noise Features of. Weaver, Tucker, Darnell 250–9
Disc. and closure 259
Cable Carrier-Telephone Terminals. Chesnut, Ilgenfritz, Kenner 237–44
Disc. and closure 259
Cables, A Carrier Telephone System for Toll. Green, Green 227–36
Disc. and closure 259
Cables, Mechanical Uniformity of Paper-Insulated. Wyatt, Smart, Reynar 141–54
Disc. and closure 486
Calculating Corona Loss from High-Voltage Transmission Lines, Empirical Method of. Carroll, Rockwell. (May 1936, p. 558–65) 168
Disc. and closure 168
Capacitive Loading, Unsymmetrical Short Circuits on Water-Wheel Generators Under. Wagner. (Nov. 1937, p. 1385–95) 406
Disc. and closure 406
Capacitor Application Problems, Analysis of Series. Butler, Concordia. (Aug. 1937, p. 975–88) 110–11
Disc. and closure 110–11
Capacitors, Absolute Power Factor of Air. Kouwenhoven, Lotz 766–72
Disc. and closure 772
Capacitors for Power-Factor Correction in Industrial Plants, The Application of. von Sothen 505–09
Car, The PCC Street. Hirshfeld 61–6
Disc 317, 355
Carbon Brushes for Steel-Mill Equipment. Kalb. (Sept. 1937, p. 1165–8)
Disc. and closure 114
Carrier-Current Relaying, The Application and Performance of. Sporn, Muller 118–24
Disc. and closure 281
Carrier-Pilot Relay System, A New High-Speed Distance-Type. Harder, Lenehan, Goldsborough 5–10
Disc. and closure 291
Carrier System, Crystal Channel Filters for the Cable. Lane 245–9
Disc. and closure 259
Carrier Telephone System, A New Single-Channel. Fisher, Almquist Mills 25–33
Disc. and closure 356
Carrier-Telephone System, Crosstalk and Noise Features of Cable. Weaver, Tucker, Darnell 250–9
Disc. and closure 259
Carrier Telephone System for Toll Cables, A. Green, Green 227–36
Disc. and closure 259
Carrier-Telephone Terminals, Cable. Chesnut, Ilgenfritz, Kenner 237–44
Disc. and closure 259
Cars in Pittsburgh, Results of Operation of PCC. Fitzgerald 315–17
Disc 317
Caused by Unbalanced Short Circuits—Effect of Amortisseur Windings, Overvoltages. Clarke, Weygandt, Concordia 453–66
Disc. and closure 466
Characteristics of the New Station-Type Autovalve Lightning Arrester. Roman. (July 1937, p. 819–22)
Disc. and closure 286
Characteristics of Typical Transmission Systems and Relation to Protector-Tube Application, Recovery-Voltage. Evans, Monteith 432–40
Disc. and closure 440
Circuit, A Static Constant-Current. Summers 636–9
Circuit Breaker, Design and Test of High-Speed High-Interrupting-Capacity Railway. Skeats 359–63
Disc. and closure 363
Circuit Breaker of High Interrupting Capacity, Enclosed Low-Voltage "De-ion" Air. Sandin 657–61
Circuit Breaker, Tests on and Performance of a High-Speed Multibreak 138-Kv Oil. Sporn, St. Clair 696–703
Disc. and closure 703
Circuit Breakers, A New Multibreak Interrupter for Fast-Clearing. Spurck, Strang 705–10
Disc. and closure 710
Circuit Breakers for A-C Feeder, Motor Starting, and Station Auxiliary Service, "De-ion" Air. Dickinson 649–53
Disc. and closure 653
Circuits, A Symbolic Analysis of Relay and Switching. Shannon 713–23
Circuits Containing Iron-Cored Reactors, Subharmonics in. Travis, Weygandt. 423–30
Disc. and closure 430
Circuits—Effect of Amortisseur Windings, Overvoltages Caused by Unbalanced Short. Clarke, Weygandt, Concordia. 453–66
Disc. and closure 466
Circuits, Resonant Nonlinear Control. Thomson 469–74
Disc. and closure 474
(Circuits) The Properties of Three-Phase Systems Deduced With the Aid of Matrices. Reed 74–7
Disc. and closure 477
Circuits Under D-C Transient Conditions, Coupling Between Parallel Earth-Return. Gould. (Sept. 1937, p. 1159–64)
Disc 357
City Transportation, Modern. Mellraith. 324–7

Coil on 100-Kv System of Public Service Company of Colorado, Test and Operation of Petersen. Hardaway, Lewis. 295–302
Disc. and closure 302
Colorado, Test and Operation of Petersen Coil on 100-Kv System of Public Service Company of. Hardaway, Lewis. 295–302
Disc. and closure 302
Combined Thyratron and Tachometer Speed Control of Small Motors. Williams 565–8
(Com. Rep.) Line-Type Lightning Arrester Performance Data 661–2
(Com. Rep.) Recent Advances in Resistance Welding 37–8
Disc. and closure 225
(Communication) A Carrier Telephone System for Toll Cables. Green, Green. 227–36
Disc. and closure 259
(Communication) A New Single-Channel Carrier Telephone System. Fisher, Almquist, Mills 25–33
Disc. and closure 356
(Communication) A Review of Radio Interference Investigation. Sanford, Weise. (Oct. 1937, p. 1248–52)
Disc. and closure 107–10
(Communication) A Symbolic Analysis of Relay and Switching Circuits. Shannon 713–23
(Communication) A System of Electric Remote-Control Accounting. Woodruff 78–87
Disc. and closure 357
(Communication) Analysis and Design of Harmonic Generators. Terman 640–5
(Communication) Cable Carrier-Telephone Terminals. Chesnut, Ilgenfritz, Kenner 237–44
Disc. and closure 259
Communication Circuits and Power-Distribution Circuits Above 5,000 Volts, Protection Features for the Joint Use of Wood Poles Carrying. Coleman, Schirmer 131–40
Disc. and closure 409
(Communication) Coupling Between Parallel Earth-Return Circuits Under D-C Transient Conditions. Gould. (Sept. 1937, p. 1159–64)
Disc. 355
(Communication) Crosstalk and Noise Features of Cable Carrier-Telephone System. Weaver, Tucker, Darnell 250–9
Disc. and closure 259
(Communication) Crystal Channel Filters for the Cable Carrier System. Lane 245–9
Disc. and closure 259
(Communication) Instruments for the New Telephone Sets. Jones 559–64
(Communication) Noise Co-ordination of Rural Power and Telephone Systems. Wahlquist, Taylor 613–20
Disc. and closure 620
(Communication) Printing Telegraph Operation of Way Wires. Vernam 365–72
(Communication) Transmission Features of the New Telephone Sets. Inglis 606–12
Communication) Transmission Lines at Very High Radio Frequencies. Reukema. (Aug. 1937, p. 1002–11)
Disc. and closure 104–07
Comparison of Methods of Stopping Squirrel-Cage Induction Motors. Bends 499–505
Conditions in Ferroresonance, Critical. Odessey, Weber 444–52
Conductors, The Current-Carrying Capacity of Rubber-Insulated. Rosch 155–67
Disc. and closure 484
Constant-Current Circuit, A Static. Summers 636–9
Contactors, Switching Surges With Transformer Load-Ratio Control. Blume, Bewley. (Dec. 1937, p. 1464–75)
Disc. 407
Control, A Self-Checking System of Supervisory. Reagan 600–05
Disc. 605
Control Circuits, Resonant Nonlinear. Thomson 469–74
Disc. and closure 474
Control Contactors, Switching Surges With Transformer Load - Ratio. Blume, Bewley. (Dec. 1937, p. 1464–75)
Disc. 407
Control for Paper Winders, Regenerative Tension. Rogers 495–9
Control in the Development of a Rural Distribution System, Voltage Regulation and. Landis 541–7
Control of D-C Motors, Thyratron. Garman 335–42
Disc. and closure 342
Control of Motors, Electronic Speed. Alexanderson, Edwards, Willis 343–52
Disc. and closure 352
Control of Network Protectors, Remote. Brownlee, Dent 685–90
Disc. and closure 690
Control of Small Motors, Combined Thyratron and Tachometer Speed. Williams. 565–8
Control, Photoelectric Weft-Straightener. LaPierre, Mansfield 513–19
Control, System Planning and Operation for Voltage. Brosman 493–5
Control, Thyratron Reactor Lighting. Schneider 328–34
Controlled Rectifier, Regulation of Grid. Kilgore, Cox. (Sept. 1937, p. 1134–40)
Disc. and closure 168
Co-ordination of Power Transformers for Steep-Front Impulse Waves. Montsinger 183–9
Disc. and closure 189
Co-ordination of Rural Power and Telephone Systems, Noise. Wahlquist, Taylor 613–20
Disc. and closure 620
Corona, Distortion of Traveling Waves by. Skilling, Dykes. (July 1937, p. 850–7)
Disc. and closure 102–04
Corona Loss From High-Voltage Transmission Lines, Empirical Method of Calculating. Carroll, Rockwell. (May 1937, p. 558–65)
Disc. and closure 168
Corona Voltages of Typical Transformer Insulations Under Oil. Vogel 34–6
Disc. and closure 478
Corona Voltages of Typical Transformer Insulations Under Oil—II. Vogel 531–3
Disc. and closure 533
Correlation of Sphere-Gap Data, A New. Ver Planck 45–9
Disc. and closure 416
Coupling Between Parallel Earth-Return Circuits Under D-C Transient Conditions. Gould. Sept. 1937, p. 1159–64)
Disc. 355
Critical Conditions in Ferroresonance. Odessey, Weber 444–52
Crosstalk and Noise Features of Cable Carrier-Telephone System. Weaver, Tucker, Darnell 250–9
Disc. and closure 259
Crystal Channel Filters for the Cable Carrier System. Lane 245–9
Disc. and closure 259
Current-Carrying Capacity of Rubber-Insulated Conductors, The. Rosch 155–67
Disc. and closure 484
Current Circuit, A Static Constant. Summers 636–9
Current-Limiting-Reactor Applications, Some Schemes of. Kierstead 272–8
Disc. and closure 278
Current-Restrained Relays for Differential Protection, Harmonic. Kennedy, Hayward 262–6
Disc. and closure 266
Currents Under Unsymmetrical Terminal Conditions, Alternator Short-Circuit. Miller, Weil. (Oct. 1937, p. 1268–76).
Disc. 401

D

"De-ion" Air Circuit Breaker of High Interrupting Capacity, Enclosed Low-Voltage. Sandin 657–61
"De-ion" Air Circuit Breakers for A-C Feeder, Motor Starting, and Station Auxiliary Service. Dickinson 649–53
Disc. and closure 653
Design and Test of High-Speed High-Interrupting Capacity Railway Circuit Breaker. Skeats 359–63
Disc. and closure 363
D-C Machine Stray-Load-Loss Tests. Siegfried. (Oct. 1937, p. 1285–9)
Disc. and closure 401
D-C Machines, Stray-Load Losses of. Schilling, Koopman. (Dec. 1937, p. 1487–91).
Disc. and closure 407
D-C Motors, Thyratron Control of. Garman 335–42
Disc. and closure 342
D-C Supply for Elevator Motors, Phanotron Rectifiers as a. Clymer, Lorraine 385–9
Disc. 389
D-C Transformer, A. Lennox, DeBlieux 554–8
Disc. 558
D-C Transformers, New Types of. Hershkind. (Nov. 1937, p. 1372–8)
Disc. 558
Discharge Currents in Distribution Arresters—II. McEachron, McMorris 307–12
Disc. and closure 312
Distance-Type Carrier-Pilot Relay System, A New High-Speed. Harder, Lenehan, Goldsborough 5–10
Disc. and closure 291
Distortion of Traveling Waves by Corona, Skilling, Dykes. (July 1937, p. 850–7)
Disc. and closure 102–04
(Distribution) Analysis of Series Capacitor Application Problems. Butler, Concordia. (Aug. 1937, p. 975–88)
